ABSTRACT

The New Jersey Council of Community Colleges designed this program guide to serve as an overview of instructional credit and noncredit programs available at the state's 19 community colleges. The guide includes a multi-page matrix that offers an overview of all career and transfer programs available and which colleges offer these programs. Credit programs that range from short-term certificate programs to associate degrees are designated in the matrix with a 'C' for certificate or a 'D' for degree. Noncredit programs are all indicated by an 'N.' Following the matrix is a list arranged alphabetically by community college, which cites the credit and noncredit programs offered by each college. The guide also includes a map of New Jersey's community colleges, along with a list of all of the schools' Web site addresses. The guide reminds readers that because community colleges often serve local labor markets, programs can change frequently. Also, it is not offered as a comprehensive listing that includes services offered outside the instructional program listings, such as Small Business Development Centers; SCORE Chapters and Business Incubators. INTRODUCTION

The New Jersey Council of County Colleges has designed this Program Guide to give all New Jerseyans an overview of instructional credit and noncredit programs available at our State's 19 community colleges.

The matrix on pages 2 through 15 provides a comprehensive look at our many career and transfer programs and where they are offered. Pages 16 through 33 are organized alphabetically by community college and list the credit and noncredit programs offered by each college. Credit programs range from short-term certificate programs to associate degrees and are indicated in the matrix as "C" for certificate or "D" for degree; noncredit programs vary widely in numbers of contact hours and are all shown in the matrix as "N" for noncredit.

Community colleges are listed in the matrix as follows:

Atlantic Cape	Atlantic Cape Community College
Bergen	Bergen Community College
Brookdale	Brookdale Community College
Burlington	Burlington County College
Camden	Camden County College
Cumberland	Cumberland County College
Essex	Essex County College
Gloucester	Gloucester County College
Hudson	Hudson County Community College
Mercer	Mercer County Community College
Middlesex	Middlesex County College
Morris	County College of Morris
Ocean	Ocean County College
Passaic	Passaic County Community College
Raritan Valley	Raritan Valley Community College
Salem	Salem Community College
Sussex	Sussex County Community College
Union	Union County College
Warren	Warren County Community College

The two community colleges whose names do not reflect the counties they serve are Brookdale Community College in Monmouth County, and Raritan Valley Community College, which serves Somerset and Hunterdon Counties. A list of community college campuses and extension centers follows this introduction.

The reader should keep in mind that because community college career programs are offered in response to local labor markets, these programs change frequently. Some are discontinued and some are modified and renamed as new programs are designed and introduced to meet new employer needs. These career programs are developed and evaluated in collaboration with advisory boards from the business or industry served by the program. The programs listed here are up to date as of academic year 2000.

It should be noted that while the information in this catalog was carefully researched, it is not identical to the official listing of programs maintained by the New Jersey Commission on Higher Education. This catalog differs in that it lists as "programs" what the Commission may list as an "option" or a major focus of study within another degree program. For example, Small Business Administration is usually offered as an option within the Business Administration program; in this catalog, Small Business Administration is listed as a program.

Finally, the reader should be aware that while this catalog presents community college instructional programs, time constraints have made it impossible to list in detail the many other services offered by New Jersey's community colleges. For example, community college entrepreneurial support services include Small Business Development Centers, SCORE Chapters and Business Incubators. Other business support services include customized training, which is available at each community college and statewide through NOTE – the Network of Occupational Training and Education. Urban campuses and extension centers offer adult basic education, English as a Second Language, and a broad range of job training and workforce readiness programs. New Jersey's community colleges offer courses at convenient and flexible hours, including evenings and weekends, and many of the campuses now have computerized phone-in or on-line registration.

For more information on New Jersey community college programs and services, please call the New Jersey Council of County Colleges at (609) 392-3434, send email to njccc@aol.com, or visit our Web site, www.njccc.org.
